What we heard.

01 • SITUATION

Where you are today

[Insert overview of their current state — team structure, GTM motion, pipeline performance, recent context.]

02 • CHALLENGES

What's getting in the way

[Insert the specific problems they articulated — pipeline gaps, ramp issues, channel limitations, capacity constraints.]

03 • ICP

Who you sell to

[Insert their ICP — industries, company size, buyer persona, geography, deal size and cycle.]

— — OUR OPERATING PRINCIPLE

Before we try to **sell you**, we need to know we can **help you**.

We hold the highest client retention rates and NPS scores in the industry — and we work hard to keep it that way. We earn it two ways: by delivering quality outbound that drives measurable impact, and by declining the engagements where we can't.

300+

CLIENTS SERVED

Across SaaS, Cloud, AI, and InfoSec — outbound campaigns engineered, run, and benchmarked.

#1

CUSTOMER RETENTION & NPS

Highest in the industry. Clients stay because the work performs — and because we only take engagements we know we can win.

5.3 yrs

EMPLOYEE RETENTION

Highest average tenure in the industry. The same tenured BDRs stay on your account — no churn, no relearning.

Stanford

ENGINEER-FOUNDED

Built by engineers who treat pipeline as a system to be modeled — not a number to be hit.

Before our next call, here's what I'm doing.

Now that we've talked, my next step is to validate fit on our end. These are the four checks I'll run with our data team before I bring you a proposal — and the gate I have to clear before I'm willing to take you on.

01

TAM Analysis

We evaluate the number of viable companies and contacts within your target market that exist in our dataset.

02

Data Enrichment & Validation

Waterfall enrichment across a broad provider network ensures contact accuracy and completeness before outreach.

03

ICP vs. Historical Performance

We compare your ICP against our campaign history — industry, persona, company size — to benchmark realistic conversion.

04

Fit Assessment & Decision

We move forward only where coverage, data, and experience align. Otherwise, we decline to proceed.
